INSTRUCTIONS FOR USE

The following Coverage Policy applies to health benefit plans administered by Cigna Companies. Certain Cigna Companies and/or lines of business only provide utilization review services to clients and do not make coverage determinations. References to standard benefit plan language and coverage determinations do not apply to those clients. Coverage Policies are intended to provide guidance in interpreting certain standard benefit plans administered by Cigna Companies. Please note, the terms of a customer's particular benefit plan document [Group Service Agreement, Evidence of Coverage, Certificate of Coverage, Summary Plan Description (SPD) or similar plan document] may differ significantly from the standard benefit plans upon which these Coverage Policies are based. For example, a customer's benefit plan document may contain a specific exclusion related to a topic addressed in a Coverage Policy. In the event of a conflict, a customer's benefit plan document always supersedes the information in the Coverage Policies. In the absence of a controlling federal or state coverage mandate, benefits are ultimately determined by the terms of the applicable benefit plan document. Coverage determinations in each specific instance require consideration of 1) the terms of the applicable benefit plan document in effect on the date of service; 2) any applicable laws/regulations; 3) any relevant collateral source materials including Coverage Policies and; 4) the specific facts of the particular situation. Each coverage request should be reviewed on its own merits. Medical directors are expected to exercise clinical judgment where appropriate and have discretion in making individual coverage determinations. Where coverage for care or services does not depend on specific circumstances, reimbursement will only be provided if a requested service(s) is submitted in accordance with the relevant criteria outlined in the applicable Coverage Policy, including covered diagnosis and/or procedure code(s). Reimbursement is not allowed for services when billed for conditions or diagnoses that are not covered under this Coverage Policy (see "Coding Information" below). When billing, providers must use the most appropriate codes as of the effective date of the submission. Claims submitted for services that are not accompanied by covered code(s) under the applicable Coverage Policy will be denied as not covered. Coverage Policies relate exclusively to the administration of health benefit plans. Coverage Policies are not recommendations for treatment and should never be used as treatment guidelines. In certain markets, delegated vendor guidelines may be used to support medical necessity and other coverage determinations.

Cigna National Formulary Coverage:

OVERVIEW

Several products are available for use in inflammatory conditions such as rheumatoid arthritis, ankylosing spondylitis, juvenile idiopathic arthritis, psoriatic arthritis, plaque psoriasis, Crohn's disease, and ulcerative colitis.[1-25] This policy involves the use of the products listed above.

The FDA-approved indications for each product listed in this policy are documented in Appendix A. For more information on criteria within a Prior Authorization program by specific condition refer to the respective standard *Prior Authorization Policy.*

POLICY STATEMENT

For all medications, this program requires the patient to meet the respective standard *Prior Authorization Policy* criteria. Additionally, this program requires trial(s) of the Preferred Product(s) according to the table below, when clinically appropriate, prior to the approval of the Non-Preferred Products. There are also

situations when trials of Non-Preferred Products will be considered; see criteria below. Other details of the program are as follows:

- **Continuation of Therapy:** Approval for a patient continuing therapy with a **Non-Preferred** subcutaneous or oral Product must be supported with verification, noted in the criteria as either **[verification in prescription claims history required]** or, if not available, as **[verification by prescriber required]**.
  - If the patient has at least 130 days of prescription claims history on file, claims history must support that the patient has received the Non-Preferred Product for the specified period of time (90 or 120 days) within a 130-day look-back period; OR
  - When 130 days of the patient's prescription claim history file is unavailable for verification, the prescriber must verify that the patient has been receiving the Non-Preferred Product for a specified period of time (90 or 120 days), AND that the patient has been receiving the Non-Preferred Product via paid claims (e.g., patient has not been receiving samples or coupons or other types of waivers in order to obtain access to the Non-Preferred Product).
  - For a patient continuing therapy, other conditions may also apply. Refer to criteria below.
- **Approval Duration:** All approvals for continuation of therapy for Preferred and Non-Preferred Products are provided for 1 year unless noted otherwise below. In cases where the initial approval is authorized in months, 1 month is equal to 30 days.

Documentation: When documentation is required, the prescriber must provide written documentation supporting the trials of these other Products, noted in the criteria as **[documentation required]**. Documentation may include, but is not limited to, chart notes, prescription claims records, and/or prescription receipts.

Selected Revision	For Psoriatic Arthritis, Plaque Psoriasis, Crohn's Disease, and Ulcerative Colitis, Selarsdi subcutaneous, ustekinumab-ttwe subcutaneous, and Yesintek subcutaneous were added as Preferred ustekinumab subcutaneous products. The criteria for the following Non-Preferred Products were updated to include these Preferred ustekinumab products: Ilumya, Siliq, Entyvio subcutaneous, Rinvoq LQ, Rinvoq, Xeljanz, Bimzelx, Cimzia, Simponi subcutaneous, Cosentyx subcutaneous, and Orencia subcutaneous. Throughout the policy, the requirement of a previous trial of Stelara subcutaneous was changed to more generally refer to a ustekinumab subcutaneous product; a note was added indicating that a trial of multiple ustekinumab products counts as one product. For Crohn's Disease and Ulcerative Colitis, the note that refers to a previous trial of Stelara intravenous was changed to more generally refer to an intravenous ustekinumab product.	03/12/2025
Selected Revision	**Effective 04/18/2025.** Tremfya subcutaneous (SC) was added as a Preferred Product for Crohn's Disease. Criteria for Cimzia, Rinvoq, and Entyvio SC were updated to include Tremfya SC as a Preferred Product. For Entyvio SC, a previous trial of Tremfya intravenous also counts.	04/02/2025

Therefore, the *Inflammatory Conditions – Ustekinumab Subcutaneous Products Preferred Specialty Management Policy for National Preferred, High Performance, and Basic Formularies – Alternate* or the *Choice* version of that policy should be referenced. Throughout the policy, a note was added to list examples of ustekinumab products which include Stelara, ustekinumab (unbranded Stelara), Imuldosa, Otulfi, Pyzchiva, ustekinumab-ttwe, Selarsdi, ustekinumab-aekn, Starjemza, Steqeyma, Wezlana, and Yesintek.	06/04/2025
Selected Revision	**Cimzia:** For **Crohn's Disease**, a patient is directed to one Step 1 Product; previously, a patient was directed to adalimumab specifically. A previous trial of an infliximab intravenous product, Omvoh intravenous, Skyrizi intravenous, Tremfya intravenous, or an ustekinumab intravenous product also counts. **Simponi Subcutaneous:** For **Ulcerative Colitis**, a patient is directed to one Step 1 Product; previously, a patient was directed to adalimumab specifically. A previous trial of an infliximab intravenous product, Omvoh intravenous, Skyrizi intravenous, Tremfya intravenous, or an ustekinumab intravenous product also counts.	08/06/2025

	Cosentyx SC: For **Psoriatic Arthritis**, Otezla was added as an agent that counts towards a trial of a Preferred Product for patients < 18 years of age. **Orencia SC:** For **Psoriatic Arthritis**, Otezla was added as an agent that counts towards a trial of a Preferred Product for patients < 18 years of age.	
Early Annual Revision	**Effective 10/01/2025.** For **Psoriatic Arthritis, Plaque Psoriasis, Crohn's Disease,** and **Ulcerative Colitis,** Imuldosa subcutaneous (SC) was added as Preferred ustekinumab SC product. The criteria for the following Non-Preferred Products were updated to include Imuldosa SC as a Preferred product: Cimzia, Simponi SC, Bimzelx, Cosentyx SC, Siliq, Ilumya, Entyvio SC, Orencia SC, Rinvoq, Rinvoq LQ, and Xeljanz/XR.	09/10/2025
