

Drug Coverage Policy

Effective Date		. 10/1/2025
Coverage Policy	Number	1403
Policy Title	.Oncology	Medications

Oncology Medications

INSTRUCTIONS FOR USE

The following Coverage Policy applies to health benefit plans administered by Cigna Companies. Certain Cigna Companies and/or lines of business only provide utilization review services to clients and do not make coverage determinations. References to standard benefit plan language and coverage determinations do not apply to those clients. Coverage Policies are intended to provide guidance in interpreting certain standard benefit plans administered by Cigna Companies, Please note, the terms of a customer's particular benefit plan document [Group Service Agreement, Evidence of Coverage, Certificate of Coverage, Summary Plan Description (SPD) or similar plan document] may differ significantly from the standard benefit plans upon which these Coverage Policies are based. For example, a customer's benefit plan document may contain a specific exclusion related to a topic addressed in a Coverage Policy. In the event of a conflict, a customer's benefit plan document always supersedes the information in the Coverage Policies. In the absence of a controlling federal or state coverage mandate, benefits are ultimately determined by the terms of the applicable benefit plan document. Coverage determinations in each specific instance require consideration of 1) the terms of the applicable benefit plan document in effect on the date of service: 2) any applicable laws/regulations: 3) any relevant collateral source materials including Coverage Policies and; 4) the specific facts of the particular situation. Each coverage request should be reviewed on its own merits. Medical directors are expected to exercise clinical judgment where appropriate and have discretion in making individual coverage determinations. Where coverage for care or services does not depend on specific circumstances, reimbursement will only be provided if a requested service(s) is submitted in accordance with the relevant criteria outlined in the applicable Coverage Policy, including covered diagnosis and/or procedure code(s). Reimbursement is not allowed for services when billed for conditions or diagnoses that are not covered under this Coverage Policy (see "Coding Information" below). When billing, providers must use the most appropriate codes as of the effective date of the submission. Claims submitted for services that are not accompanied by covered code(s) under the applicable Coverage Policy will be denied as not covered. Coverage Policies relate exclusively to the administration of health benefit plans. Coverage Policies are not recommendations for treatment and should never be used as treatment guidelines. In certain markets, delegated vendor quidelines may be used to support medical necessity and other coverage determinations.

This coverage policy addresses medications used for the primary treatment of cancer. The use of oncology agents for non-oncology uses are addressed in separate coverage policies.

For a list of medications included in the oncology medications coverage policy, refer to the <u>Cigna - Oncology Medication and Code List</u> document.

All products are approved for a duration of up to 12 months unless otherwise noted.

Oncology Medications for any other use is considered not medically necessary. Criteria will be updated as new published data are available.

Oncology Medications for uses that are an NCCN category 3 recommendation (unless the use is approved by the FDA) are not covered because they are considered not medically necessary.

Coverage Policy

Oncology Medications are considered medically necessary when BOTH of the following are met:

- 1. **ONE** of the following criteria are met:
 - a. Use is an approved indication by the Food and Drug Administration (FDA)
 - b. Use is a category 1, 2A, or 2B recommendation by the National Comprehensive Cancer Network (NCCN) Clinical Practice Guidelines in Oncology (NCCN Guidelines®) or its derivative information product, The NCCN Drugs & Biologics Compendium (NCCN Compendium®)
 - c. For **Pediatric Oncology** use, **ALL** of the following criteria are met:
 - i. The drug is FDA approved for at least one indication
 - ii. The drug has not been contraindicated or not recommended by the FDA for the off-label use
 - iii. Supported by **ONE** of the following:
 - 1. Compendia recognized by federal Centers for Medicare and Medicare Services (CMS) as part of an anticancer chemotherapeutic regimen (AHFS, Clinical Pharmacology, DrugDex, etc.)
 - 2. Results of at least two different controlled clinical studies published in peer reviewed English-language, biomedical journal(s) analyzed as supporting the off-label use where consideration is given to quality of evidence, validity of the data, efficacy, and safety of the drug in specific patient populations and how well the study was designed to assess the intervention, including analysis of baseline patient characteristics, patient withdrawals, and meaningful clinical outcome
 - 3. Established as standard of care as analyzed in clinical practice guidelines from professional or medical specialty societies, national government supported evidence assessments or guidelines
- 2. If required, preferred product criteria are met as listed in the below table

Product	Criteria
Abraxane	Cigna Pathwell Specialty Drug List Plans
intravenous	
infusion	Abraxane is considered medically necessary when BOTH of the
(paclitaxel albumin-	following are met:
bound)	1. When the Oncology Medications criteria above the table are met
-	2. Documentation of ONE of the following:
	a. For Breast Cancer , ONE of the following:
	i. Patient is currently receiving Abraxane or paclitaxel
	albumin-bound intravenous infusion
	ii. Patient has a hypersensitivity to paclitaxel intravenous
	infusion or docetaxel intravenous infusion
	iii. Patient had a contraindication to the standard pre-
	medications (for example, dexamethasone, ranitidine,
	famotidine, diphenhydramine)
	b. For <u>Cervical Cancer</u> , ONE of the following:
	i. Patient is currently receiving Abraxane or paclitaxel
	albumin-bound intravenous infusion

ii. Patient has a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient had a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) c. For **Endometrial Cancer**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient has a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient had a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) d. For Melanoma, ONE of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) e. For **Non-Small Cell Lung Cancer**, **ONE** of the following: Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) iv. Abraxane or paclitaxel albumin-bound intravenous infusion is being used as subsequent therapy in patients with advanced or metastatic disease f. For **Ovarian Cancer**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) q. **All Other Conditions**. Approve Abraxane intravenous infusion if the patient meets the Oncology Medications criteria above the table Akeega **Employer Plans** (niraparib and abiraterone) Akeega is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met

2. **ONE** of the following:

ONE of the following:

A. For **BRCA-mutated Prostate Cancer**, documentation of

	 Trial of, contraindication, or intolerance to Lynparza (olaparib), with or without, generic abiraterone [may require prior authorization] Currently receiving Akeega All Other Conditions. Approve Akeega if the patient meets the Oncology Medications criteria above the table
Alunbrig	Individual and Family Plans:
(brigatinib)	Alunbrig (brigatinib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Non-Small Cell Lung Cancer – Anaplastic Lymphoma Kinase (ALK)-positive, documentation of ONE of the following: i. Trial of, contraindication, or intolerance to Alecensa (alectinib) [may require prior authorization] ii. Patient has already been started on therapy with Alunbrig B. All Other Conditions. Approve Alunbrig if the patient meets the Oncology Medications criteria above the table
Alymsys	Employer Plans and Individual and Family Plans
(bevacizumab-maly)	Alymsys (bevacizumab-maly) is considered medically necessary when BOTH of the follow are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of the following: A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to BOTH of the following: i. Mvasi (bevacizumab-awwb) [may require prior authorization] ii. Zirabev (bevacizumab-bvzr) [may require prior authorization]
Augtyro	Employer Plans
(repotrectinib)	Augtyro (repotrectinib) is considered medically necessary when BOTH of the follow are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For ROS1-positive non-small cell lung cancer, documentation of ONE of the following: i. Trial of, contraindication, or intolerance to Rozlytrek (entrectinib) ii. If Augtyro has not been tried previously, approve if the patient has symptomatic systemic progression (multiple lesions) on Rozlytrek (entrectinib capsules and pellet packet), Xalkori (crizotinib capsules), or Zykadia (ceritinib capsules and tablets) iii. Patient has congestive heart failure or, according to the prescriber, the patient has a risk of QT prolongation

	iv. Patient is currently receiving therapy with Augtyro B. All Other Conditions . Approve Augtyro if the patient meets the Oncology Medications criteria above the table
Avastin®	Employer Plans and Individual and Family Plans
(bevacizumab)	Avastin (bevacizumab) is considered medically necessary when BOTH of the follow are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of the following: A. Trial AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to BOTH of the following: i. Mvasi (bevacizumab-awwb) [may require prior authorization] ii. Zirabev (bevacizumab-bvzr) [may require prior authorization]
Besremi	Employer Plans and Individual and Family Plans
(ropeginterferon-alfa-2b-njft)	Besremi (ropeginterferon-alfa-2b-njft) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met AND 2. ONE of the following: A. For Polycythemia Vera, ONE of the following (A, B, C, or D): i. Patient has high risk polycythemia vera and documentation provided that the patient has ONE of the following: (i or ii) 1. Documentation provided that the patient has tried hydroxyurea 2. Documentation provided that the patient is NOT a candidate for hydroxyurea therapy ii. Documentation provided that the patient has low-risk polycythemia vera iii. Documentation provided that the patient is currently receiving Besremi B. All Other Conditions. Approve Besremi if the patient meets the Oncology Medications criteria above the table
Boruzu (bortezomib	Employer Plans and Individual and Family Plans
injection)	Boruzu (bortezomib injection) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met AND 2. Patient has tried bortezomib injection (Velcade, generics)
Bosulif	Employer Plans:
(bosutinib tablets)	Bosulif (bosutinib tablets) is considered medically necessary when BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. ONE of the following (A or B):

- A. For **Chronic Myeloid Leukemia (CML)**, **ONE** the following:
 - i. Trial of, contraindication, or significant intolerance to **ONE** of the following (1,2,3,4,5, or 6):
 - 1. dasatinib
 - 2. imatinib
 - 3. **nilotinib**
 - 4. **Danziten** [may require prior authorization]
 - 5. **Imkeldi** [may require prior authorization]
 - 6. **Scemblix** [may require prior authorization]
 Note: Prior use of brand Gleevec, Phyrago, Sprycel, or Tasigna counts.
 - ii. Patient is currently receiving therapy with Bosulif
 - iii. Patient meets **BOTH** of the following:
 - 1. Patient meets **ONE** of the following:
 - a. Patient has intermediate- to high-risk chronic phase CML
 - b. Patient has accelerated phase CML or blast phase CML
 - 2. Patient meets **ONE** of the following:
 - a. Patient has a history of a serious, chronic lung disease or has had or is at risk of pleural effusion; OR <u>Note</u>: Examples of lung disease are pulmonary arterial hypertension and interstitial pneumonitis.
 - Patient is at risk of bleeding; OR
 <u>Note</u>: An example of a patient with an
 increased risk of bleeding as if a patient
 has thrombocytopenia or is receiving a
 medication that inhibits platelet
 function or anticoagulants.
 - Patient has a prolonged QT interval or is at risk of developing QT interval prolongation
 - iv. Patient has a resistance mutation in which imatinib, dasatinib, nilotinib, Danziten, Imkeldi, or Scemblixshould not be used
- B. **All Other Conditions**. Approve Bosulif if the patient meets the Oncology Medications criteria above the table

Individual and Family Plans

Bosulif (bosutinib tablets) is considered medically necessary when BOTH of the following are met (1 and 2):

- 1. When the Oncology Medications criteria above the table are met
- 2. **ONE** of the following (A or B):
 - A. For **Chronic Myeloid Leukemia (CML)**, **ONE** the following:
 - i. Trial of, contraindication, or significant intolerance to **ONE** of the following (1 or 2):
 - 1. **imatinib** [may require prior authorization]
 - 2. **dasatinib or Sprycel** [may require prior authorization]

	Note: Prior use of brand Gleevec, Imkeldi, or Phyrago also counts. ii. Patient is currently receiving therapy with Bosulif iii. Patient meets BOTH of the following: 1. Patient meets ONE of the following a. Patient has intermediate- to high-risk chronic phase CML b. Patient has accelerated phase CML or blast phase CML 2. Patient meets ONE of the following: a. Patient has a history of a serious, chronic lung disease or has had or is at risk of pleural effusion Note: Examples of lung disease are pulmonary arterial hypertension and interstitial pneumonitis. b. Patient is at risk of bleeding Note: An example of a patient with an increased risk of bleeding as if a patient has thrombocytopenia or is receiving a medication that inhibits platelet function or anticoagulants. c. Patient has a prolonged QT interval or is at risk of developing QT interval prolongation iv. Patient has a resistance mutation in which one of imatinib and dasatinib should not be used B. All Other Conditions. Approve Bosulif if the patient meets the Oncology Medications criteria above the table
Braftovi® (encorafenib)	Employer Plans: Braftovi is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Melanoma, Unresectable or Metastatic, Treatment of BRAF V600 Mutation-Positive Disease, documentation of ONE of the following: i. Trial of, contraindication, significant intolerance, or other exceptional clinical circumstance to ONE of the following: 1. Tafinlar 2. Zelboraf ii. Patient is currently receiving Braftovi B. All Other Conditions. Approve Braftovi if the patient meets the Oncology Medications criteria above the table
Cyclophosphamide tablets	Employer Plans and Individual and Family Plans Cyclophosphamide tablets is considered medically necessary when
This applies to oncology and non-	BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met

oncology uses of	2. Documented trial of, contraindication, or intolerance to
cyclophosphamide.	cyclophosphamide capsules
	<u> </u>
Danziten	Employer Plans:
(nilotinib tablets)	Banaltan (allatinik tablata) is annolden den disallan annolden den
	Danziten (nilotinib tablets) is considered medically necessary when BOTH of the following are met (A and B):
	A. When the Oncology Medications criteria above the table are met
	B. ONE of the following (a or b):
	a. For <u>Chronic Myeloid Leukemia (CML)</u> , ONE the following:
	A. Trial of, contraindication, or significant intolerance to
	ONE of the following:
	1. dasatinib
	2. imatinib
	3. nilotinib
	<u>Note</u> : Prior use of brand Gleevec, Imkeldi,
	Phyrago, Sprycel, or Tasigna also counts
	B. Patient is currently receiving therapy with Danziten
	C. Patient meets BOTH of the following:
	1. Patient meets ONE of the following:
	a. Patient has intermediate- to high-risk
	chronic phase CML b. Patient has accelerated phase CML or
	blast phase CML
	2. Patient meets ONE of the following:
	a. Patient has a history of serious, chronic
	lung disease or has had or is at risk of
	pleural effusion; OR
	Note: Examples of lung disease are
	pulmonary arterial hypertension and
	interstitial pneumonitis.
	b. Patient is at risk of bleeding; OR
	Note: An example of a patient with an
	increased risk of bleeding is a patient with thrombocytopenia or with
	with thrombocytopenia or with medication use that inhibits platelet
	function or anticoagulants.
	D. Patient has a resistance mutation in which imatinib
	and dasatinib should not be used
	b. All Other Conditions . Approve Danziten if the patient
	meets the Oncology Medications criteria above the table
	Individual and Family Plans
	Danziten (nilotinib tablets) is considered medically necessary when
	BOTH of the following are met (A and B):
	A. When the Oncology Medications criteria above the table are met
	B. ONE of the following (a or b):
	a. For <u>Chronic Myeloid Leukemia (CML)</u> , ONE the following:
	A. Trial of, contraindication, or significant intolerance to
	ONE of the following:
	dasatinib or Sprycel imatinib
	2. imatinib

	Note: Prior use of brand Gleevec, Imkeldi, Phyrago, also counts B. Patient is currently receiving therapy with Danziten C. Patient meets BOTH of the following: 1. Patient meets ONE of the following: a. Patient has intermediate- to high-risk chronic phase CML b. Patient has accelerated phase CML or blast phase CML 2. Patient meets ONE of the following: a. Patient has a history of serious, chronic lung disease or has had or is at risk of pleural effusion; OR Note: Examples of lung disease are pulmonary arterial hypertension and interstitial pneumonitis. b. Patient is at risk of bleeding; OR Note: An example of a patient with an increased risk of bleeding is a patient with thrombocytopenia or with medication use that inhibits platelet function or anticoagulants. D. Patient has a resistance mutation in which imatinib and dasatinib should not be used b. All Other Conditions. Approve Danziten if the patient meets the Oncology Medications criteria above the table
Design	Employer Plane and Individual and Family Plane
Docivyx (docetaxel)	Employer Plans and Individual and Family Plans Docivyx is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Patient has tried generic docetaxel
Ensacove	Individual and Family Plans
(ensartinib hydrochloride)	Ensacove is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Non-Small Cell Lung Cancer – anaplastic lymphoma kinase (ALK)-positive, ONE of the following: 1. Patient has tried or is unable to take Alecensa Note: A trial of Lorbrena would also meet an approval. 2. Patient has already been started on therapy with Ensacove. B. All Other Conditions. Approve Ensacove if the patient meets the Oncology Medications criteria above the table
(imatinib)	Employer Plans and Individual and Family Plans Gleevec (imatinib) is considered medically necessary when BOTH of the following are met:

	 When the Oncology Medications criteria above the table are met Patient has tried <u>imatinib</u> (the bioequivalent generic product) AND cannot take due to a formulation difference in the inactive ingredient(s) [e.g., difference in dyes, fillers, preservatives] between the brand and bioequivalent generic product which, per the prescriber, would result in a significant allergy or serious adverse reaction
Herceptin® (trastuzumab)	Employer Plans and Individual and Family Plans Herceptin (trastuzumab) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of ONE of the following: A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to ALL of the following: i. Kanjinti (trastuzumab-anns) [may require prior authorization] ii. Ogivri (trastuzumab-dkst) [may require prior authorization] iii. Trazimera (trastuzumab-qyyp) [may require prior authorization]
Herceptin Hylecta™ (trastuzumab and hyaluronidase-oysk)	Employer Plans and Individual and Family Plans Herceptin Hylecta (trastuzumab and hyaluronidase-oysk) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of ONE of the following: A. Patient has trial of, contraindication, or intolerance to ONE of the following: i. Kanjinti (trastuzumab-anns) [may require prior authorization] ii. Ogivri (trastuzumab-dkst) [may require prior authorization] iii. Trazimera (trastuzumab-qyyp) [may require prior authorization] B. Patient is unable to obtain or maintain intravenous access C. Currently receiving Herceptin Hylecta
Hercessi (Trastuzumab-strf)	Employer Plans and Individual and Family Plans Hercessi (trastuzumab-strf) is considered medically necessary when BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. Documentation of ONE of the following: A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to ALL of the following:

	 i. Kanjinti (trastuzumab-anns) [may require prior authorization] ii. Ogivri (trastuzumab-dkst) [may require prior authorization] iii. Trazimera (trastuzumab-qyyp) [may require prior authorization]
Herzuma®	Employer Plans and Individual and Family Plans
(trastuzumab-pkrb)	Herzuma (trastuzumab-pkrb) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of ONE of the following: A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to ALL of the following: i. Kanjinti (trastuzumab-anns) [may require prior authorization] ii. Ogivri (trastuzumab-dkst) [may require prior authorization] iii. Trazimera (trastuzumab-qyyp) [may require prior authorization]
	-
Ibrance® (palbociclib)	Ibrance (palbociclib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Breast Cancer, documentation of ONE of the following: i. Trial of, contraindication, or intolerance to ONE of the following: a. Kisqali (ribociclib) [may require prior authorization] b. Verzenio (abemaciclib) [may require prior authorization] ii. For premenopausal patients using in combination with fulvestrant as subsequent therapy (not initial therapy), approve if the patient has tried Verzenio iii. Patient will be using Ibrance in combination with Itovebi iv. Currently receiving Ibrance B. All Other Conditions. Approve Ibrance if the patient meets the Oncology Medications criteria above the table
Iclusig (ponatinib tablets)	Iclusing (ponation tablets) is considered medically necessary when
	BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. Meets ONE of the following (A, B, C, or D): A. Patient is currently receiving Iclusig B. For Chronic Myeloid Leukemia (CML), ONE of the following:

- Trial of, contraindication, significant intolerance to **TWO** of the following:
 - 1) dasatinib
 - 2) imatinib
 - 3) nilotinib
 - 4) **Danziten** [may require prior authorization]
 - 5) **Imkeldi** [may require prior authorization]
 - 6) **Scemblix** [may require prior authorization]
 Note: Prior use of brand Gleevec, Phyrago, Sprycel, or Tasigna also counts.
- ii. Patient meets **BOTH** of the following:
 - 1) Patient has intermediate- to high-risk chronic phase CML, accelerated phase CML, or blast phase CML
 - 2) Patient has tried at least two other tyrosine kinase inhibitors for CML

<u>Note</u>: Examples of tyrosine kinase inhibitors include: dasatinib products (e.g. Sprycel, Phyrago), Bosulif, Tasigna, Danziten and Scemblix.

- iii. Patient has a resistance mutation in which imatinib, dasatinib, nilotinib, Danziten, Imkeldi, or Scemblix should not be used
- iv. Patient has the T315I mutation
- C. For <u>Acute Lymphoblastic Leukemia (ALL)</u>, **ONE** of the following:
 - Trial of, contraindication, significant intolerance to **ONE** of the following:
 - 1) dasatinib
 - 2) imatinib

 $\underline{\text{Note}}$: Prior use of Gleevec , Imkeldi, Phyrago, or Sprycel also counts.

- ii. Patient is ≥ 18 years of age, has newly diagnosed disease, and is taking the requested medication with chemotherapy; OR
- iii. Patient has T315I-positive mutation; OR
- iv. Patient has a history of serious, chronic lung disease or has had or is a risk of pleural effusion
 Note: Examples of lung diseases include pulmonary arterial hypertension and interstitial pneumonitis.
- v. Patient has a resistance mutation in which imatinib or dasatinib should not be used
- vi. Patient is currently receiving therapy with Iclusig
- D. **All Other Conditions**. Approve Iclusig if the patient meets the Oncology Medications criteria above the table

Individual and Family Plans

Iclusig (ponatinib tablets) is considered medically necessary when BOTH of the following are met (1 and 2):

- 1. When the Oncology Medications criteria above the table are met
- 2. Meets **ONE** of the following (A, B, or C):

A. For **Chronic Myeloid Leukemia (CML)**, **ONE** of the following:

- i. Patient meets **BOTH** of the following:
 - 1) Patient meets **ONE** of the following:
 - a. Trial of, contraindication, significant intolerance to **imatinib** [may require prior authorization]
 - <u>Note</u>: Prior use of brand Gleevec or Imkeldi also counts.
 - b. Patient has intermediate- to high-risk chronic phase CML, accelerated phase CML, or blast phase CML
 - c. Patient has tried at least one other tyrosine kinase inhibitor for CML
 - <u>Note</u>: Examples of tyrosine kinase inhibitors include: dasatinib, Phyrago, Bosulif, Tasigna, Danziten, and Scemblix.
 - Patient has a resistance mutation in which imatinib not be used

2) Patient meets **ONE** of the following:

- a. Trial of, contraindication, significant intolerance to dasatinib or Sprycel [may require prior authorization]
 Note: Prior use of Phyrago (dasatinib) also counts.
- Patient has tried at least two other tyrosine kinase inhibitors for CML Note: Examples of tyrosine kinase inhibitors include: Sprycel, Phyrago, Bosulif, Tasigna, Danziten, and Scemblix.
- Patient has a history of serious, chronic lung disease or has had or is a risk of pleural effusion
 - <u>Note</u>: Examples of lung diseases include pulmonary arterial hypertension and interstitial pneumonitis.
- d. Patient has a resistance mutation in which dasatinib should not be used
- ii. Patient has the *T315I* mutation
- iii. Patient is currently receiving Iclusig

B. For <u>Acute Lymphoblastic Leukemia (ALL)</u>, **ONE** of the following:

- According to the prescriber, patient has had a trial of, contraindication, significant intolerance to **ONE** of the following:
 - 1) **imatinib** [may require prior authorization]
 - 2) **dasatinib or Sprycel** [may require prior authorization]

<u>Note</u>: Prior use of Gleevec, Imkeldo, or Phyrago also counts.

- ii. Patient is ≥ 18 yers of age, has newly diagnosed disease, and is taking the requested medication with chemotherapy;
 OR
- iii. Patient has T315I mutation; OR
- iv. Patient has a history of serious, chronic lung disease or has had or is a risk of pleural effusion
 Note: Examples of lung diseases include pulmonary arterial hypertension and interstitial pneumonitis.
- v. Patient has a resistance mutation in which imatinib or dasatinib should not be used
- vi. Patient is currently receiving Iclusig
- C. **All Other Conditions**. Approve Iclusig if the patient meets the Oncology Medications criteria above the table

Imkeldi (imatinib oral solution)

Employer Plans

Imkeldi (imatinib oral solution) is considered medically necessary when BOTH of the following is met (1 and 2):

- 1. When the Oncology Medications criteria above the table are met
- 2. Meets **ONE** of the following (A or B):
 - A. For <u>Chronic Myeloid Leukemia (CML)</u>, patient meets BOTH of the following:
 - i. Patient is ≥ 18 years old; AND
 - ii. Patient meets ONE of the following:
 - 1. Patient meets BOTH of the following:
 - a. Patient has tried imatinib tablets; AND Note: Prior use of Gleevec also counts.
 - b. Patient cannot take generic imatinib due to a formulation difference in the inactive ingredient(s) [e.g., difference in dyes, fillers, preservatives] between the brand and bioequivalent generic product which, per the prescriber, would result in a significant allergy or serious adverse reaction; OR
 - 2. Patient is unable to swallow or has difficulty swallow tablets.
 - B. **All Other Conditions**. Approve Imkeldi if the patient meets the Oncology Medications criteria above the table

Individual and Family Plans

Imkeldi (imatinib oral solution) is considered medically necessary when BOTH of the following is met (1 and 2):

- 1. When the Oncology Medications criteria above the table are met
- 2. Patients meets ONE of the following (A or B):
 - A. Patient meets BOTH of the following:
 - Patient has tried imatinib tablets; AND Note: Prior use of Gleevec also counts.
 - ii. Patient cannot take generic imatinib due to a formulation difference in the inactive ingredient(s) [e.g., difference in dyes, fillers, preservatives] between the brand and

	bioequivalent generic product which, per the prescriber, would result in a significant allergy or serious adverse reaction; OR B. Patient is unable to swallow or has difficulty swallowing tablets.
	Dr. Facient is unable to swallow of flas afficiency swallowing tablets.
Infugem [™]	Employer Plans and Individual and Family Plans
(gemcitabine)	Infugem (gemcitabine) is considered medically necessary when BOTH of the following is met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of, contraindication, or intolerance to generic gemcitabine
Ivra	Employer Plans and Individual and Family Plans
(melphalan)	 Ivra (melphalan) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Patient has tried and cannot use melphalan injection (Alkeran, generics).
Jemperli™	Employer Plans and Individual and Family Plans
	Jemperli (dostarlimab) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Mismatch Repair Deficient (dMMR) or Microsatellite Instability-High (MSI-H) Endometrial Cancer - Monotherapy, documentation of ONE of the following: i. Trial of, contraindication, or intolerance to Keytruda (pembrolizumab) [may require prior authorization] ii. Currently receiving Jemperli B. For Mismatch Repair Deficient (dMMR) or Microsatellite Instability-High (MSI-H) Solid Tumors - Monotherapy, documentation of ONE of the following: Note: Examples of solid tumors include ampullary adenocarcinoma, biliary tract cancer, breast cancer, esophageal and esophagogastric junction cancer, gastric cancer, hepatocellular cancer, and ovarian cancer. i. Trial of, contraindication, or intolerance to Keytruda (pembrolizumab) [may require prior authorization] ii. Currently receiving Jemperli C. All Other Conditions (e.g., rectal cancer). Approve Jemperli if the patient meets the Oncology Medications criteria above the table
Keytruda	Employer Plans and Individual and Family Plans
(pembrolizumab)	Keytruda (pembrolizumab) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following:

	A. For, Nasopharyngeal Carcinoma , documentation of ONE of
	the following:
	i. Patient has been started on Keytruda
	ii. Patient meets ALL of the following:
	a. Patient has recurrent, unresectable,
	oligometastatic, or metastatic disease
	b. The medication is used in combination with
	cisplatin and gemcitabine
	c. According to the prescriber, the patient has
	inadequate efficacy, contraindication, or
	significant intolerance to Loqtorzi (toripalimab
	intravenous infusion) [may require prior
	authorization]
	iii. Patient meets ALL of the following:
	a. Patient has recurrent, unresectable,
	oligometastatic, or metastatic disease
	b. Tumor is tumor mutational burden-high (TMB-H)
	[≥ 10 mutations/megabase] c. Medication is used for subsequent therapy
	iv. Patient meets ALL of the following:
	a. Patient has recurrent or metastatic disease; AND
	b. Tumor is programmed death-ligand 1 positive
	(combined positive score [CPS] ≥ 1); AND
	c. Medication is used for subsequent therapy.
	B. All Other Conditions . Approve Keytruda if the patient meets
	the Oncology Medications criteria above the table

If the patient has already been started on therapy with Khapzory, patient has tried generic levoleucovorin calcium injection Employer Plans and Individual and Family Plans Krazati (adagrasib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For KRAS G12C-mutated Non-Small Cell Lung Cancer, documentation of ONE of the following: i. Trial of, contraindication, or intolerance to sotorasib (Lumakras) [may require prior authorization] ii. Patient has brain metastases

Mektovi® (binimetinib)	Employer Plans: Mektovi is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Melanoma, Unresectable or Metastatic, Treatment of BRAF V600 Mutation-Positive Disease, documentation of ONE of the following: i. Trial of, contraindication, significant intolerance, or other exceptional clinical circumstance to ONE of the following:
	1. Cotellic 2. Mekinist ii. Patient is currently receiving Mektovi B. All Other Conditions. Approve Mektovi if the patient meets the Oncology Medications criteria above the table
Nexavar (sorafenib)	Nexavar (sorafenib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of sorafenib (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
	Individual and Family Plans Nexavar (sorafenib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of sorafenib (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
Nilandron® (nilutamide)	Employer Plans and Individual and Family Plans Nilandron (nilutamide) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of nilutamide (the bioequivalent generic product) AND cannot take due to formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
Nilotinib	Individual and Family Plans Nilotinib is considered medically necessary when BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. ONE of the following (A or B):

A. For **Chronic Myeloid Leukemia (CML), ONE** of the following:

- i. Trial of, contraindication, significant intolerance to **ONE** of the following:
 - a. **imatinib** [may require prior authorization]
 - **b. dasatinib or Sprycel** [may require prior authorization]

Note: Prior use of brand Gleevec, Imkeldi or Phyrago counts.

- ii. Patient is currently receiving nilotinib
- iii. Patient is less than 18 years of age with accelerated phase CML
- iv. Patient meets **BOTH** of the following:
 - a. Patient meets **ONE** of the following:
 - Patient has intermediate- to high-risk disease chronic phase CML
 - ii. Patient has accelerated phase CML or blast phase CML
 - b. Patient meets **ONE** of the following:
 - Patient has a history of serious, chronic lung disease or has had or is at risk of pleural effusion

<u>Note</u>: Examples of lung disease, pulmonary arterial hypertension, and interstitial pneumonitis.

- ii. Patient is at risk of bleeding Note: An example of a patient with an increased risk of bleeding is a patient with thrombocytopenia or with a medication that inhibits platelet function or anticoagulants.
- v. Patient has a resistance mutation in which imatinib and dasatinib should not be used
- B. **All Other Conditions**. Approve nilotinib if the patient meets the Oncology Medications criteria above the table

Onivyde

(irinotecan liposomal intravenous infusion)

Employer Plans and Individual and Family Plans

Onivyde (irinotecan liposomal intravenous infusion) is considered medically necessary when BOTH of the following are met:

- 1. When the Oncology Medications criteria above the table are met
- 2. **ONE** of the following:
 - A. For <u>Pancreatic Adenocarcinoma</u>, documentation of **ONE** of the following:
 - i. According to the prescriber, the patient has experienced an inadequate response or significant intolerance, has a contraindication for irinotecan intravenous infusion
 - ii. Patient has been started on Onivyde
 - iii. Patient meets **BOTH** of the following:
 - a. Medication will be used for subsequent therapy
 - b. Patient meets **ONE** of the following (1, 2, or 3):
 - According to the prescriber, patient is Eastern Cooperative Oncology Group performance status of 2; OR

2. According to prescriber, patient is Eastern Cooperative Oncology Group Performance Status 0 or 1 and has tried a gemcitabine-based regimen; OR 3. According to prescriber, patient is Eastern Cooperative Oncology Group Performance Status 0 or 1 and has tried a flouropyrimidine-based regimen but without prior irinotecan. B. For **Ampullary Adenocarcinoma**, documentation of **ONE** of the following: i. According to the prescriber, the patient has experienced an inadequate response, significant intolerance, or has a contraindication for irinotecan intravenous infusion; OR ii. Patient has been started on Onivyde. C. **All Other Conditions**. Approve Onivyde if the patient meets the Oncology Medications criteria above the table Ontruzant® **Employer Plans and Individual and Family Plans** (trastuzumab-dttb) Ontruzant (trastuzumab-dttb) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of **ONE** of the following: A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to **ALL** of the following: i. Kanjinti (trastuzumab-anns) [may require prior authorization1 ii. Ogivri (trastuzumab-dkst) [may require prior authorization1 iii. **Trazimera (trastuzumab-qyyp)** [may require prior authorization] Opdivo **Employer Plans and Individual and Family Plans** (nivolumab) Opdivo (nivolumab) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. **ONE** of the following: A. For, **Nasopharyngeal Carcinoma**, documentation of **ONE** of the following: i. Patient has been started on Opdivo ii. Patient meets **ALL** of the following: a. Patient has recurrent, unresectable, oligometastatic, or metastatic disease b. The medication is used in combination with cisplatin and gemcitabine c. According to the prescriber, the patient has inadequate efficacy, contraindication, or significant intolerance to Loqtorzi (toripalimab intravenous infusion) [may require prior authorization]

	iii. Patient meets BOTH of the following: a. Patient has recurrent or metastatic non- keratinizing disease; AND
	b. Medication is used for subsequent therapy. B. All Other Conditions . Approve Opdivo if the patient meets the Oncology Medications criteria above the table
0 41 0	For allower Plants and Todicides Land For the Plants
Opdivo Qvantig (nivolumab and hyaluronidase- nvhy)	 Employer Plans and Individual and Family Plans Opdivo Qvantig (nivolumab and hyaluronidase-nvhy) is considered medically necessary when BOTH of the following are met: When the Oncology Medications criteria above the table are met Documentation provided that the patient has ONE of the following: A. Patient has tried and cannot take Opdivo intravenous (IV) [may require prior authorization] B. Patient is unable to obtain IV access.
Orgovyx [®]	Individual and Family Plans
(relugolix)	Orgovyx (relugolix) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For, Prostate Cancer, documentation of ONE of the following: i. Patient has tried ONE of the following: a. Eligard [may require prior authorization] b. Firmagon [may require prior authorization] c. Trelstar [may require prior authorization] ii. According to the prescriber, is at risk of cardiovascular disease iii. Using for intermittent androgen deprivation therapy iv. Currently receiving Orgovyx B. All Other Conditions. Approve Orgovyx if the patient meets the Oncology Medications criteria above the table
Paclitaxel	Cigna Pathwell Specialty Drug List Plans
albumin-bound intravenous infusion	Paclitaxel albumin-bound intravenous infusion is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of ONE of the following: A. For Breast Cancer, ONE of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) B. For Cervical Cancer, ONE of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion

ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) C. For **Endometrial Cancer**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) D. For **Melanoma**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) E. For **Non-Small Cell Lung Cancer**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) iv. Abraxane or paclitaxel albumin-bound intravenous infusion is being used as subsequent therapy in patients with advanced or metastatic disease F. For **Ovarian Cancer**, **ONE** of the following: i. Patient is currently receiving Abraxane or paclitaxel albumin-bound intravenous infusion ii. Patient had a hypersensitivity to paclitaxel intravenous infusion or docetaxel intravenous infusion iii. Patient has a contraindication to the standard premedications (for example, dexamethasone, ranitidine, famotidine, diphenhydramine) G. All Other Conditions. Approve paclitaxel albumin-bound intravenous infusion if the patient meets the Oncology Medications criteria above the table Rituxan® **Employer Plans and Individual and Family Plans** (rituximab) Rituxan (rituximab) is considered medically necessary when BOTH of the following are met:

When the Oncology Medications criteria above the table are met
 Documentation provided that the patient has the following:

A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which,

according to the prescriber, would result in a significant allergy or serious adverse reaction for **ALL** of the following: i. Riabni (rituximab-arrx) [may require prior authorization] ii. Ruxience (rituximab-pvvr) [may require prior authorization1 iii. Truxima (rituximab-abbs) [may require prior authorization] Rituxan Hycela™ **Employer Plans and Individual and Family Plans** (rituximab and hyaluronidase Rituxan Hycela (rituximab and hyaluronidase human) is considered human) medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documentation of **ONE** of the following: A. **BOTH** of the following: i. Has received at least one dose of intravenous rituximab ii. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction for **ALL** of the following: a. Riabni (rituximab-arrx) [may require prior authorization1 b. **Ruxience (rituximab-pvvr)** [may require prior authorization1 c. **Truxima (rituximab-abbs)** [may require prior authorization] B. Currently receiving Rituxan Hycela Scemblix **Individual and Family Plans** (asciminib tablets) Scemblix (asciminib tablets) is considered medically necessary when BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. **ONE** of the following (a or b): a. For **Chronic Myeloid Leukemia (CML)**, **ONE** of the following: A. Patient meets **BOTH** of the following: i. Patient meets **ONE** of the following: a. Trial of, contraindication, significant intolerance to imatinib Note: Prior use of brand Gleevec and Imkeldi also counts. b. Patient has newly diagnosed disease c. Patient has intermediate- to high-risk chronic phase CML, accelerated CML or blast phase CML d. Patient has tried at least one other tyrosine kinase inhibitor for CML Note: Examples of tyrosine inhibitors include: dasatinib, Phyrago, Bosulif, Tasigna, Danziten and Iclusia. e. Patient has a resistance mutation in which imatinib should not be used

	ii. Patient meets ONE of the following: a. Trial of, contraindication, significant intolerance to dasatinib or Sprycel Note: Prior use of Phyrago (dasatinib tablets) also counts. b. Patient has tried at least one other tyrosine kinase inhibitors for CML Note: Examples of tyrosine kinase inhibitors include: dasatinib, Phyrago, Bosulif, Tasigna, Danziten, and Iclusig. c. Patient has a history of serious, chronic lung disease or has had or is at risk of pleural effusion Note: Examples of lung disease are pulmonary arterial hypertension and interstitial pneumonitis. d. Patient is at risk of bleeding Note: Examples of increased risk of bleeding are if a patient has thrombocytopenia or is receiving a medication that inhibits platelet function or anticoagulants. e. Patient has a resistance mutation in which dasatinib should not be used B. Patient is currently receiving Scemblix C. Patient has the <i>T3151</i> mutation b. All Other Conditions . Approve Scemblix if the patient meets the Oncology Medications criteria above the table
Sprycel (dasatinib)	 Sprycel (dasatinib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of <u>dasatinib</u> (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
Sutent	Employer Plans and Individual and Family Plans
(sunitinib)	Sutent (sunitinib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of sunitinib (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
Talzenna® (talazoparib)	Employer Plans Talzenna (talazoparib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following:

	 i. Trial of, contraindication, significant intolerance to ONE of the following:
	a. imatinib [may require prior authorization]b. dasatinib or Sprycel [may require prior
	authorization] Note : Prior use of brand Gleevec, Imkeldi or
	Phyrago counts.
	ii. Patient is currently receiving Tasigna
	iii. Patient is less than 18 years of age with accelerated phase
	CML
	iv. Patient meets BOTH of the following:
	a. Patient meets ONE of the following: i. Patient has intermediate- to high-risk
	disease chronic phase CML
	ii. Patient has accelerated phase CML or
	blast phase CML
	b. Patient meets ONE of the following:
	i. Patient has a history of serious, chronic
	lung disease or has had or is at risk of pleural effusion
	Note: Examples of lung disease, pulmonary
	arterial hypertension, and interstitial
	pneumonitis.
	ii. Patient is at risk of bleeding
	Note: An example of a patient with an increased risk of bleeding is a patient with
	thrombocytopenia or with a medication that
	inhibits platelet function or anticoagulants.
	v. Patient has a resistance mutation in which imatinib and
	dasatinib should not be used
	B. All Other Conditions . Approve Tasigna if the patient meets the
	Oncology Medications criteria above the table
Temodar®	Employer Plans and Individual and Family Plans
(temozolomide)	Tomoday (tomogalomida) is considered modically necessary when
	Temodar (temozolomide) is considered medically necessary when BOTH of the following are met:
	When the Oncology Medications criteria above the table are met
	2. Documented trial of temozolomide (the bioequivalent generic
	product) [may require prior authorization] AND cannot take due to a
	formulation difference in the inactive ingredient(s) which would result
	in a significant allergy or serious adverse reaction
Tepylute (thiotepa)	Effective 11/1/2025
(Employer Plans and Individual and Family Plans
	Tepylute (thiotepa) is considered medically necessary when BOTH
	of the following are met:
	1. When the Oncology Medications criteria above the table are met
	2. Patient has tried and cannot take one of the following: generic thiotepa
	injection or Tepadina

Tykerb® (lapatinib)	Employer Plans and Individual and Family Plans
,	Tykerb (lapatinib) is considered medically necessary when BOTH of the following are met:
	 When the Oncology Medications criteria above the table are met Documented trial of <u>lapatinib</u> (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction
Vectibix	Cigna Pathwell Specialty Drug List Plans
(panitumumab intravenous infusion)	Vectibix (panitumumab intravenous infusion) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Colon or Rectal Cancer, documentation of ONE of the following: i. According to the prescriber, the patient has experienced an inadequate response or significant intolerance, has a contraindication for Erbitux (cetuximab intravenous infusion); OR ii. Patient has been started on Vectibix; OR iii. Patient had a serious infusion reaction to Erbitux; OR iv. ONE of the following (i or ii): a. According to the prescriber, patient lives in high endemic rates of alpha-gal; OR b. Patient has known alpha-gal positivity B. All Other Conditions. Approve Vectibix if the patient meets the Oncology Medications criteria above the table
Vegzelma (bevacizumab-adcd)	Employer Plans and Individual and Family Plans
,	Vegzelma (bevacizumab-adcd) is considered medically necessary when BOTH of the following are met:
	When the Oncology Medications criteria above the table are met Documentation of the following: A Trial of AND capacit continue to use the alternative (s) due to a
	A. Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to BOTH of the following: i. Mvasi (bevacizumab-awwb) [may require prior authorization] ii. Zirabev (bevacizumab-bvzr) [may require prior authorization]
Votrient® (pazopanib)	Employer Plans and Individual and Family Plan
(1,2-2,5-11-2)	Votrient (pazopanib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met

	2. Documented trial of <u>pazopanib</u> (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction		
Xeloda [®]	Employer Plans and Individual and Family Plans		
(capecitabine)			
	 Xeloda (capecitabine) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of capecitabine (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction 		
Yonsa [®]	Employer Plans and Individual and Family Plans		
(abiraterone)	Yonsa (abiraterone) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Prostate Cancer – Metastatic, Castration-Resistant, documentation of ONE of the following: i. Documented trial of, contraindication, or intolerance to generic abiraterone ii. Patient has been started on therapy with Yonsa B. All Other Conditions. Approve Yonsa if the patient meets the Oncology Medications criteria above the table		
Ziihera	Employer Plans and Individual and Family Plans :		
(zanidatamab-hrii)	Ziihera (zanidatamab-hrii) is considered medically necessary when BOTH of the following are met (1 and 2): 1. When the Oncology Medications criteria above the table are met 2. ONE of the following (A or B): A. For Biliary Tract Cancer in which the tumor is human epidermal growth factor receptor 2 (HER2) positive with immunohistochemistry score of 3+ (IHC3+) as determined by an approved test in a patient ≥ 18 years of age, ONE of the following: 1. Patient has tried one of the following regimens or, according to the prescriber, all the regimens are contraindicated (A, B, or C): A. Enhertu; OR B. Trastuzumab plus Perjeta [may require prior authorization]; OR C. Trastuzumab plus Tukysa [may require prior authorization] 2. Patient has already been started on therapy with Ziihera. B. All Other Conditions. Approve Ziihera if the patient meets the		
	Oncology Medications criteria above the table		

Zvkadia **Employer Plans:** (ceritinib) Zykadia (ceritinib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Non-Small Cell Lung Cancer – Anaplastic Lymphoma Kinase (ALK)-positive, documentation of ONE of the following: 1. Patient has tried Alecensa or Alunbrig 2. Patient is currently receiving Zykadia B. **All Other Conditions**. Approve Zykadia if the patient meets the Oncology Medications criteria above the table **Individual and Family Plans** Zykadia (ceritinib) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. ONE of the following: A. For Non-Small Cell Lung Cancer - Anaplastic Lymphoma **Kinase (***ALK***)-positive**, documentation of **ONE** of the following: 1. Patient has tried Alecensa 2. Patient is currently receiving Zykadia B. **All Other Conditions**. Approve Zykadia if the patient meets the Oncology Medications criteria above the table Zvtiga® **Employer Plans and Individual and Family Plans** (abiraterone) Zytiga (abiraterone) is considered medically necessary when BOTH of the following are met: 1. When the Oncology Medications criteria above the table are met 2. Documented trial of **abiraterone** (the bioequivalent generic product) [may require prior authorization] AND cannot take due to a formulation difference in the inactive ingredient(s) which would result in a significant allergy or serious adverse reaction

When coverage is available and medically necessary, the dosage, frequency, duration of therapy, and site of care should be reasonable, clinically appropriate, and supported by evidence-based literature and adjusted based upon severity, alternative available treatments, and previous response to therapy.

Receipt of sample product does not satisfy any criteria requirements for coverage.

• The NCCN Drugs & Biologics Compendium (NCCN Compendium®) [available with paid subscription] http://www.nccn.org/professionals/drug compendium/content/contents.asp

The National Comprehensive Cancer Network® (NCCN®) is an organization of cancer centers, developing treatment guidelines for most cancers. The NCCN Clinical Practice Guidelines in Oncology (NCCN Guidelines®) present evidenced-based recommendations for the diagnosis and treatment of cancer and cancer care supportive therapies. NCCN provides the following definitions for their categories of recommendations:²

- Category 1: Based upon high-level evidence, there is uniform NCCN consensus that the intervention is appropriate;
- Category 2A: Based upon lower-level evidence, there is uniform NCCN consensus that the intervention is appropriate;
- Category 2B: Based upon lower-level evidence, there is NCCN consensus that the intervention is appropriate;
- Category 3: Based upon any level of evidence, there is major NCCN disagreement that the intervention is appropriate.

For the 'uniform NCCN consensus' defined in Category 1 and Category 2A, a majority Panel vote of at least 85% is required. For the 'NCCN consensus' defined in Category 2B, a Panel vote of at least 50% (but less than 85%) is required. Lastly, for recommendations where there is strong Panel disagreement regardless of the quality of the evidence, NCCN requires a vote from at least three Panel Members (representing at least three different Member Institutions) to include and designate a recommendation as Category 3. The large majority of the recommendations put forth in the Guidelines are Category 2A. Where categories are not specified within the Guidelines, the default designation for the recommendation is Category 2A.

The NCCN Drugs & Biologics Compendium (NCCN Compendium®) includes FDA Approved Indications of cancer and cancer support medications and recommended non-FDA approved uses based upon the recommendations contained within the NCCN Guidelines.

Revision Details

Type of Revision	Summary of Changes	Date
Selected Revision	Fruzaqla Appendiceal, Colon or Rectal Cancer: Added preferred product step requirement through Lonsurf for Employer Plans Krazati Added has brain metastases exception to the sotorasib (Lumakras) preferred product step requirement	5/15/2024
Selected Revision	Augtyro ROS1-positive non-small cell lung cancer: Added preferred product step requirement through Rozlytrek for Employer Plans	6/1/2024
	Abraxane and Paclitaxel albumin-bound Updated Abraxane and Paclitaxel albumin-bound preferred product requirement criteria on Cigna Pathwell Specialty Drug List Plans	
Selected Revision	Alunbrig/Zykadia Non-Small Cell Lung Cancer – anaplastic lymphoma kinase (ALK)-positive: Added preferred product step requirement through Alecensa for Employer and Individual and Family Plans	7/1/2024
	Votrient Added preferred product step requirement through generic pazopanib for Employer Plans	
	Braftovi Melanoma, unresectable or metastatic, treatment of <i>BRAF</i> V600 mutation-positive: Added preferred product step requirement through Tafinlar or Zelboraf on Employer plans	
	Mektovi Melanoma, unresectable or metastatic, treatment of BRAF V600 mutation-positive: Added preferred product step requirement through Cotellic or Mekinist for Employer plans	
	Bosulif Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive: Updated preferred product criteria to add Scemblix and Tasigna as step requirement options, Updated preferred product step requirement exceptions	

	Gleevec Updated preferred product step through generic imatinib requirement criteria Iclusig Chronic Myeloid Leukemia, Philadelphia Chromosome Positive: Updated preferred product criteria to add Scemblix and Tasigna as step requirement options, Updated step requirement from requiring "ONE" to requiring "TWO" preferred products for Employer and Individual and Plans, Updated exceptions to the step requirement for	
	Employer plans and Individual and Family Plans Acute Lymphoblastic Leukemia, Philadelphia Chromosome Positive: Added preferred product step requirement through generic imatinib or Sprycel for Iclusig	
	Scemblix Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive: Removed Scemblix preferred product step requirement on Employer Plans, Updated step requirement from requiring "ONE" to requiring "TWO" preferred products for Individual and Plans, Updated exceptions to the step requirement for Individual and Family Plans	
	Tasigna Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive: Updated exceptions to the step requirement for Employer and Individual and Family Plans	
Selected Revision	Tecentriq Non-Small Cell Lung Cancer – Advanced or Metastatic, Squamous or Non-Squamous Cell Disease: Updated Tecentriq preferred product criteria: changed "initial therapy" to "first-line therapy"; added "patient has a performance status of 3" as an exception to the preferred product Keytruda step requirement	8/1/2024
Selected Revision	Pomalyst Removed Pomalyst preferred product criteria requirement.	9/1/2024
Selected Revision	Anktiva Added Anktiva preferred product criteria requirement for Employer Plans and Individual and Family Plans	10/15/2024
	Besremi Updated from "Employer Plans and" to "Employer Plans and Individual and Family Plans"	

Docivyx

Added Docivyx preferred product criteria requirement for Employer Plans and Individual and Family Plans

Yonsa

Added "Prostate Cancer - Metastatic, Castration-Resistant" to the preferred product criteria for Employer Plans and Individual and Family Plans

Sandostatin LAR Depot.

Removed criteria for Sandostatin LAR Depot for Employer Plans and Individual and Family Plan

Effective 1/1/2025:

Keytruda

Added Keytruda preferred product criteria requirement for Cigna Pathwell Specialty Drug List Plans.

Lupron Depot

Added Lupron Depot preferred product criteria for Employer Plans and Individual and Family Plans.

Onivyde

Added Onivyde preferred product criteria for Employer Plans and Individual and Family Plans.

OvibaO

Added Opdivo preferred product criteria requirement for Cigna Pathwell Specialty Drug List Plans.

Orgovyx

Updated from "Trial of, contraindication, or intolerance to ONE of the following: Eligard [may require prior authorization], Firmagon [may require prior authorization], Lupron Depot [may require prior authorization], Trelstar [may require prior authorization]" to "Patient has tried ONE of the following: Eligard [may require prior authorization], Firmagon [may require prior authorization], Trelstar [may require prior authorization" for Individual and Family Plans.

Vectibix

Added Vectibix preferred product criteria requirement for Cigna Pathwell Specialty Drug List Plans.

Votrient

	Added Votrient preferred product criteria for	
	Individual and Family Plans.	
Selected Revision	Ibrance.	12/5/2024
	Added "Patient will be using Ibrance in	
	combination with Itovebi"	
	Effective 1/15/2025	
	Scemblix.	
	Added "Patient has newly diagnosed disease" option	
	under generic imatinib criteria	
Selected Revision	Bosulif	1/1/2025
Selected Revision		1/1/2025
	Employer Plans:	
	Updated from 'Sprycel [may require prior	
	authorization]' to 'generic dasatinib'	
	Updated from 'Note: Prior use of Gleevec or	
	Phyrago (dasatinib) counts.' to 'Note: Prior use of	
	Gleevec (imatinib), Phyrago (dasatinib), or Sprycel	
	(dasatinib) counts.'	
	Individual and Family Plans:	
	Added 'generic dasatinib or' to 'Sprycel [may	
	require prior authorization]'	
	Keytruda	
	Updated preferred product criteria from "Cigna	
	Pathwell Specialty Drug List Plans" to "Employer	
	Plans and Individual and Family Plans"	
	Updated from "Tumor is tumor mutational	
	burden-high (TMB-H) [≥ 10 mutations/megabase]"	
	to "Tumor is tumor mutational burden-high (TMB-	
	H) [≥ 10 mutations/megabase] "	
	Added patient has recurrent or metastatic disease,	
	tumor is programmed death-ligand 1 positive	
	(combined positive score [CPS] \geq 1), and	
	medication is used as subsequent therapy as new	
	option for approval.	
	Iclusig	
	Employer Plans:	
	Updated from 'Sprycel [may require prior	
	authorization]' to 'generic dasatinib'	
	Updated from 'Note: Prior use of Gleevec or	
	Phyrago (dasatinib) counts.' to 'Note: Prior use of	
	Gleevec (imatinib), Phyrago (dasatinib), or Sprycel	
	(dasatinib) counts.'	
	Individual and Family Plans: Added 'generic	
	dasatinib' or' to 'Sprycel [may require prior	
	authorization]'	
	Lanreotide acetate (by Cipla)	
	Added "Effective 1/1/2025 through 2/15/2025" to	
	criteria	

	Opdivo Updated preferred product criteria from "Cigna Pathwell Specialty Drug List Plans" to "Employer Plans and Individual and Family Plans" Added patient has recurrent or metastatic non-keratinizing disease and medication is used for subsequent therapy as new option for approval	
	Scemblix Individual and Family Plans: Updated from Trial of, contraindication, significant intolerance to Sprycel' to 'Trial of, contraindication, significant intolerance to generic dasatinib or Sprycel'	
	Sprycel Added preferred product preferencing criteria for Employer Plans	
	Tasigna Employer Plans: Updated from 'Sprycel [may require prior authorization]' to 'generic dasatinib' Updated from 'Note: Prior use of Gleevec or Phyrago (dasatinib) counts.' to 'Note: Prior use of Gleevec (imatinib), Phyrago (dasatinib), or Sprycel (dasatinib) counts.' Individual and Family Plans: Added 'generic dasatinib or' to 'Sprycel [may require prior authorization]'	
	Vectibix Added "According to the prescriber, patient lives in high endemic rates of alpha-gal" or "patient has known alpha-gal positivity"	
Selected Revision	Abraxane intravenous infusion. Added "All Other Conditions. Approve Abraxane intravenous infusion if the patient meets the Oncology Medications criteria above the table"	4/15/2025
	Akeega. Added "All Other Conditions. Approve Akeega if the patient meets the Oncology Medications criteria above the table" Alunbrig. Added "All Other Conditions. Approve Alunbrig if the patient meets the Oncology Medications criteria above the table"	
	Anktiva. Added "All Other Conditions. Approve Anktiva if the patient meets the Oncology Medications criteria above the table"	

Augtyro.

Added "All Other Conditions. Approve Augtyro if the patient meets the Oncology Medications criteria above the table"

Besremi.

Removed, for polycythemia vera, Pegasys as an alternative option

Added "Documentation provided that the patient has:" to polycythemia vera criteria

Added "All Other Conditions. Approve Besremi if the patient meets the Oncology Medications criteria above the table"

Bosulif.

Added "All Other Conditions. Approve Bosulif if the patient meets the Oncology Medications criteria above the table"

Braftovi.

Added "All Other Conditions. Approve Braftovi if the patient meets the Oncology Medications criteria above the table"

Fruzagla

Added "All Other Conditions. Approve Fruzaqla if the patient meets the Oncology Medications criteria above the table"

Fusilev.

Removed criteria for Fusilev.

Herceptin.

Removed "Currently receiving Herceptin"

Herceptin Hylecta.

Updated from "Trial of AND cannot continue to use the alternative(s) due to a formulation difference in the inactive ingredient(s) which, according to the prescriber, would result in a significant allergy or serious adverse reaction to ONE of the following: Kanjinti (trastuzumab-anns) [may require prior authorization], Ogivri (trastuzumab-dkst) [may require prior authorization], Trazimera (trastuzumab-qyyp) [may require prior authorization]" to "Trial of, contraindication, or intolerance to ONE of the following: Kanjinti (trastuzumab-anns) [may require prior authorization], Ogivri (trastuzumabdkst) [may require prior authorization], Trazimera (trastuzumab-qyyp) [may require prior authorization]"

Updated from "Unable to obtain or maintain intravenoud access" **to** "Patient is unable to obtain or maintain intravenous access"

Herzuma.

Removed "Currently receiving Herzuma"

Ibrance.

Added "For premenopausal patients using in combination with fulvestrant as subsequent therapy (not initial therapy), approve if the patient has tried Verzenio"

Added "**All Other Conditions**. Approve Ibrance if the patient meets the Oncology Medications criteria above the table"

Iclusig.

Added "**All Other Conditions**. Approve Iclusig if the patient meets the Oncology Medications criteria above the table"

Jemperli.

Added, for Mismatch Repair Deficient (dMMR) or Microsatellite Instability-High (MSI-H) Solid Tumors – Monotherapy, "Note: Examples of solid tumors include ampullary adenocarcinoma, biliary tract cancer, breast cancer, esophageal and esophagogastric junction cancer, gastric cancer, hepatocellular cancer, and ovarian cancer."

Added "All Other Conditions (e.g., rectal cancer). Approve Jemperli if the patient meets the Oncology Medications criteria above the table"

Kevtruda.

Added "**All Other Conditions**. Approve Keytruda if the patient meets the Oncology Medications criteria above the table"

Khapzory.

Updated from "Inability to obtain leucovorin injection due to a documented drug shortage (Food and Drug Administration [FDA] Drug Shortage database or American Society of Health-Systems Pharmacists [ASHP] Drug Shortage list" **to** "Meets ONE of the following: Patient has tried one generic levoleucovorin calcium injection or generic leucovorin injection; If the patient has already started on therapy with Khapzory, patient has tried generic levoleucovorin calcium injection."

Krazati.

Added "All Other Conditions. Approve Krazati if the patient meets the Oncology Medications criteria above the table"

Lanreotide acetate (by Cipla).

Removed criteria for lanreotide acetate (by Cipla)

Lupron Depot 7.5 mg, 22.5 mg, 30 mg, 45 mg. All Other Conditions. Approve Lupron Depot 7.5 mg, 22.5 mg, 30 mg, 45 mg if the patient meets the Oncology Medications criteria above the table

Mektovi.

Added "All Other Conditions. Approve Mektovi if the patient meets the Oncology Medications criteria above the table"

Nilandron.

Removed "trial of, contraindication, or intolerance to ONE of the following: Bicalutamide, Flutamide"

Orgovyx.

Added to criteria "For Prostate Cancer"

Onivyde.

Added "**All Other Conditions**. Approve Onivyde if the patient meets the Oncology Medications criteria above the table"

Ontruzant.

Removed "Currently receiving Ontruzant"

Opdivo.

Added "All Other Conditions. Approve Opdivo if the patient meets the Oncology Medications criteria above the table"

Orgovyx.

Added "**All Other Conditions**. Approve Orgovyx if the patient meets the Oncology Medications criteria above the table"

Paclitaxel albumin-bound intravenous infusion.

Added "**All Other Conditions**. Approve paclitaxel albumin-bound intravenous infusion if the patient meets the Oncology Medications criteria above the table"

Provenge.

Added "All Other Conditions. Approve Provenge if the patient meets the Oncology Medications criteria above the table"

	Scemblix. For the exception to the requirement of a trial of Sprycel, the requirement that the patient has tried at least "two" other tyrosine kinase inhibitors for CML was changed to at least "one" other tyrosine kinase inhibitor for CML. Added "All Other Conditions. Approve Scemblix if the patient meets the Oncology Medications criteria above the table" Talzenna. Updated from "For BRCA-mutated Prostate Cancer, ONE of the following: Documented trial of, contraindication, intolerance to Lynparza (olaparib) [may require prior authorization], Currently receiving Talzenna" to "For BRCA-mutated prostate cancer, documented trial of, contraindication, intolerance to Lynparza (Olaparib) [may require prior authorization], Patient has a homologous recombination repair (HHR) mutation OTHER THAN a BRCA-mutation (i.e., patient does not have a BRCA mutation), Currently receiving Talzenna" Added "All Other Conditions. Approve Talzenna if the patient meets the Oncology Medications criteria above the table" Tasigna. Added "All Other Conditions. Approve Tasigna if the patient meets the Oncology Medications criteria above the table" Vectibix Added "All Other Conditions. Approve Tecentriq if the patient meets the Oncology Medications criteria above the table" Vectibix Added "All Other Conditions. Approve Vectibix if the patient meets the Oncology Medications criteria above the table" Vectibix Added "All Other Conditions. Approve Vectibix if the patient meets the Oncology Medications criteria above the table" Yonsa Added "All Other Conditions. Approve Yonsa if the patient meets the Oncology Medications criteria above the table"	
Selected Revision	Alunbrig. Updated from "Patient is currently receiving Alunbrig" to "Patient has already been started on therapy with Alunbrig"	5/15/2025

	Boruzu.	
	Added criteria for Boruzu	
	Lupron Depot.	
	Removed criteria for Lupron Depot.	
	Tecentriq. Removed criteria for Tecentriq (Effective	
	4/15/2025)	
	,, ==, ====,	
Selected Revision	Afinitor.	6/15/2025
	Removed Afinitor criteria	
	Bosulif.	
	Employer Plans	
	Updated from "For Chronic Myeloid Leukemia	
	(CML), Philadelphia Chromosome Positive,	
	documentation of ONE the following:Trial of,	
	contraindication, or significant intolerance to ONE of the following: Generic dasatinib, Generic imatinib,	
	Scemblix [may require prior authorization],	
	Tasigna [may require prior authorization] Note:	
	Prior use of Gleevec (imatinib), Phyrago (dasatinib),	
	or Sprycel (dasatinib) counts" to "For Chronic	
	Myeloid Leukemia (CML), Philadelphia Chromosome Positive, ONE the following: Trial of,	
	contraindication, or significant intolerance to ONE of	
	the following: dasatinib, imatinib, Danziten [may	
	require prior authorization], Imkeldi [may require	
	prior authorization], Scemblix [may require prior	
	authorization], Tasigna [may require prior authorization]Note: Prior use of brand Gleevec,	
	Phyrago, or Sprycel counts."	
	Added "Patient has a history of a serious, chronic	
	lung disease or has had or is at risk of pleural	
	effusion; Note: Examples of lung disease are	
	pulmonary arterial hypertension and interstitial pneumonitis."	
	Added Danziten, Imkeldi to "Patient has a resistant	
	mutation" criteria	
	Beaulif	
	Bosulif Individual and Family Plans	
	Updated from "For Chronic Myeloid Leukemia	
	(CML), Philadelphia Chromosome Positive,	
	documentation of ONE the following: Trial of,	
	contraindication, or significant intolerance to ONE of	
	the following: generic imatinib [may require prior authorization], generic dasatinib or Sprycel [may	
	require prior authorization	
	Note: Prior use of Gleevec (imatinib), Imkeldi, or	
	Phyrago (dasatinib) counts" to "For <u>Chronic Myeloid</u>	

<u>Leukemia (CML), Philadelphia Chromosome</u> <u>Positive</u>, ONE the following:

Trial of, contraindication, or significant intolerance to ONE of the following: imatinib [may require prior authorization], dasatinib or Sprycel [may require prior authorization]

Note: Prior use of brand Gleevec, Imkeldi, or Phyrago also counts"

Danziten.

Added Danziten criteria.

Hercessi.

Added Hercessi criteria

Iclusig.

Employer Plans

Updated from "For <u>Chronic Myeloid Leukemia</u> (<u>CML</u>), <u>Philadelphia Chromosome Positive</u>, documentation of ONE of the following:Trial of, contraindication, significant intolerance to TWO of the following:

Generic Dasatinib, generic imatinib, Scemblix [may require prior authorization], Tasigna [may require prior authorization] Note: Prior use of Gleevec (imatinib), Phyrago (dasatinib), or Sprycel (dasatinib) counts." **To** "

For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, ONE of the following:Trial of, contraindication, significant intolerance to TWO of the following: dasatinib, imatinib, Danziten [may require prior authorization], Imkeldi [may require prior authorization], Scemblix [may require prior authorization], Tasigna [may require prior authorization] Note: Prior use of brand Gleevec, Phyrago, or Sprycel also counts."

Added Danziten to tyrosine kinase inhibitor examples

Added Danziten, Imkeldi to "Patient has a resistant mutation" criteria

Updated from "For Acute Lymphoblastic Leukemia (ALL), Philadelphia Chromosome-Positive, documentation of ONE of the following: Trial of, contraindication, significant intolerance to ONE of the following: generic dasatinib, generic imatinib Note: Prior use of Gleevec (Imatiib), Phyrago (dasatinib), or Sprycel (dasatinib) counts." **To** "Trial of, contraindication, significant intolerance to ONE of the following: dasatinib, imatinib

Note: Prior use of Gleevec , Imkeldi, Phyrago, or Sprycel also counts."

Removed examples of dasatinib products

Added "Patient is currently receiving therapy with Iclusig

Iclusig

Individual and Family Plans.

Updated form "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, documentation of ONE of the following: Patient meets BOTH of the following: Patient meets ONE of the following: Trial of, contraindication, significant intolerance to generic imatinib [may require prior authorization] Note: Prior use of Gleevec (Imatinib) also counts." To "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, ONE of the following:

Patient meets BOTH of the following: Patient meets ONE of the following:

Trial of, contraindication, significant intolerance to imatinib [may require prior authorization]

Note: Prior use of brand Gleevec or Imkeldi also counts.

Added Danziten to examples of tyrosine kinase inhibitors

Removed "Patient is at risk of bleeding" with note **Updated from** "For Acute Lymphoblastic Leukemia (ALL), Philadelphia Chromosome-Positive, documentation of ONE of the following: According to the prescriber, patient has had a trial of, contraindication, significant intolerance to ONE of the following: generic imatinib [may require prior authorization], generic dasatinib or Sprycel [may require prior authorization] Note: Prior use of Gleevec (imatinib), or Phyrago (dasatiib) counts." **To** "For Acute Lymphoblastic Leukemia (ALL), Philadelphia Chromosome-Positive, ONE of the following: According to the prescriber, patient has had a trial of, contraindication, significant intolerance to ONE of the following: imatinib [may require prior authorization], dasatinib or Sprycel [may require prior authorization] Note: Prior use of Gleevec, Imkeldo, or Phyrago also counts."

Imkeldi.

Added Imkeldi criteria

Scemblix.

Individual and Family Plan.

Updated from "For <u>Chronic Myeloid Leukemia</u> (<u>CML</u>), <u>Philadelphia Chromosome Positive</u>, documentation of ONE of the following: Patient meets BOTH of the following: Patient meets ONE of the following: Trial of, contraindication, significant intolerance to generic imatinib <u>Note</u>: Prior use of

	Gleevec (imatinib) counts." To "For <u>Chronic Myeloid Leukemia (CML)</u> , <u>Philadelphia Chromosome Positive</u> , ONE of the following: Patient meets BOTH of the following:Patient meets ONE of the following: Trial of, contraindication, significant intolerance to imatinib <u>Note</u> : Prior use of brand Gleevec and Imkeldi also counts." Added Danziten to tyrosine kinase examples	
	Tasigna Employer Group Plans Updated from "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, documentation of ONE of the following:Trial of, contraindication, significant intolerance to ONE of the following: generic dasatinib, generic imatinib Note: Prior use of Gleevec (imatinib), Phyrago (dasatinib), or Sprycel (dasatinib) counts." To "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, ONE of the following: Trial of, contraindication, significant intolerance to ONE of the following: dasatinib, imatinib Note: Prior use of brand Gleevec, Phyrago, or Sprycel also counts."	
	Tasigna Individual and Family Plans Updated from "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, documentation of ONE of the following: Trial of, contraindication, significant intolerance to ONE of the following: generic imatinib [may require prior authorization], generic dasatinib or Sprycel [may require prior authorization] Note: Prior use of Gleevec (imatinib), or Phyrago (dasatinib) counts." To "For Chronic Myeloid Leukemia (CML), Philadelphia Chromosome Positive, ONE of the following: Trial of, contraindication, significant intolerance to ONE of the following: imatinib [may require prior authorization], dasatinib or Sprycel [may require prior authorization] Note: Prior use of brand Gleevec, Imkeldi or Phyrago counts."	
Calastad Pavisian	Ziihera. Added Ziihera criteria	7/1/2025
Selected Revision	Danziten. Updated from "Patient meets ONE of the following: Patient is at risk of bleeding <u>Note</u> : An example of a patient with an increased risk of bleeding as if a patient has thrombocytopenia or is receiving a medication that inhibits platelet function or anticoagulants; Patient has a prolonged QT interval	7/1/2025

	or is at risk of developing QT interval prolongation" to "Patient meets ONE of the following: Patient has a history of serious, chronic lung disease or has had or is at risk of pleural effusion; OR Note: Examples of lung disease are pulmonary arterial hypertension and interstitial pneumonitis; Patient is at risk of bleeding; OR Note: An example of a patient with an increased risk of bleeding is a patient with thrombocytopenia or with medication use that inhibits platelet function or anticoagulants."	
	Opdivo Qvantig. Added Opdivo Qvantig criteria	
	Rituxan. Removed "Currently receiving Rituxan"	
	Ziihera. Added 'may require prior authorization' to: trastuzumab plus Perjeta, trastuzumab plus Tukysa	
Selected Revision	Anktiva. Removed Anktiva criteria.	7/15/2025
	Alymsys. Removed "Currently receiving Alymsys"	
	Avastin. Removed "Currently receiving Avastin"	
	Vegzelma Removed "Currently receiving Vegzelma"	
Selected Revision	Ensacove. Added criteria for Ensacove for Individual and Family Plan	9/1/2025
	Onivyde. Pancreatic Adenocarcinoma: Removed the requirement that patient has been previously treated with fluoropyrimidine-based therapy without irinotecan.
